## California 911 System

CA 911 Outages		
Northern California	Central California	Southern California
No 911 Outages	No 911 Outages	911 Outages

### 911 Outages/Remote/Community Isolations:

On 12/05/17, the Frontier Santa Paula remote central office in Ventura County reported that 329 landlines had no dial tone due to power failure as a result of the Thomas Fire. Currently, these customers are unable to dial out to 911. However, wireless service is not impacted at this time. The Public Safety Answering Point (PSAP), Ventura County Sheriffs Office (VCSO), are taking calls normally and have been notified of the isolation.

- Per the CA 911 Branch on 12/14/17 at 1844 hours:
  - Per Frontier, the Topa Hut remote office has been temporarily restored through a microwave shot from the South Mountain.
  - Dial tone is restored for customers with access lines and wiring that is in tact.
    - Individual customers with damaged distribution lines are still out of landline service.
  - Destroyed lines and poles in the area will need to be repaired before service can be re-established fully.
  - Repair work is in progress, as some access to the affected area is now being granted.

### Service Interruptions:

Per the CA 911 Branch on 12/13/17 at 1009 hours:

Due to massive infrastructure damage caused by the Thomas Fire, the ongoing wireline community isolation in Santa Paula will not be resolved in the immediate future.

- Per Frontier, the remote office has power but the destroyed lines and poles in the area will need to be repaired before service can be re-established.
- A temporary microwave solution is being stood up in the area, however even with the microwave solution, those individuals customers with damaged distribution lines will still be out of landline service.
- No ETTR has been provided at this time, Frontier will provide a status update on 12/15/17.

# **WEATHER OF CONCERN**

## **Weather of Concern**

- The National Weather Service has issued Red Flag Warnings for several Northern California counties, beginning 12/15/17 at 2200 hours and extending through 1000 hours on 12/17/17. Gusty winds and very low relative humidity are expected to produce critical fire conditions.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

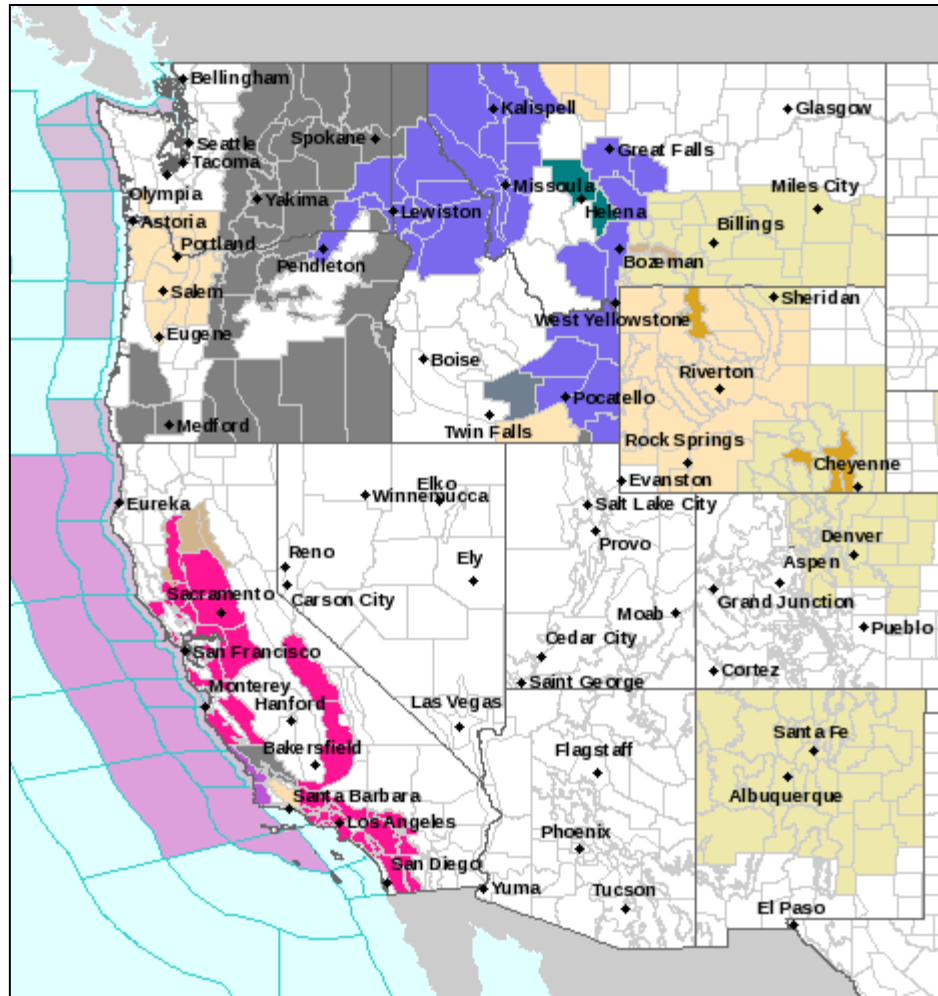

A stronger, cold frontal passage is still expected tonight into tomorrow. Some light precipitation, mainly in the form of snow, will be possible across the far north. The bigger story will be the strong to very strong N to NE winds. Expect general gusts between 30 to 40 mph with localized gusts as high as 60 mph favoring the tonight through tomorrow night period. The Diablo-Santa Cruz, Bay Marine and Sacramento Valley and surrounding foothill Predictive Service Areas will be impacted the most by the strong wind. At the same time, humidity values will lower behind the frontal passage and allow for teen minimums by tomorrow afternoon.

The wind gradient will begin to relax some on Sunday with much lighter speeds Monday. Residual low to very low humidity values expected both Sunday and Monday before gradually climbing on Tuesday. Based on the combination of fuel and weather conditions, have decided to go with a High Risk for the Sacramento Valley and surrounding foothills, Bay Marine and Diablo-Santa Cruz PSA's during the weekend period. Humidity and temperatures are a bit marginal but the wind speeds should overcompensate that. There are also areas within the Sacramento Valley that have had better greenup although the surrounding foothills are more susceptible to fire spread. Another potent cold frontal passage is expected to impact Northern California Wednesday through Friday. Temperatures should be even cooler with this system and break the long string of above normal afternoon readings the region has been observing. Some precipitation will also be possible with this frontal passage but amounts look to be on the lighter side at this time.

## **SOUTHERN CALIFORNIA**

Expect winds of 20-30 mph with gusts over 50 mph through the Banning Pass, Santa Ana Canyon and much of San Diego County this morning before winds slacken during the afternoon. Another cold air surge moving into the West may bring gusty north winds of 15-25 mph with locally higher gusts to Santa Barbara County and the I-5 Corridor tonight into tomorrow morning. These winds should weaken quickly. Temperatures will generally be tracking downward through tomorrow with highs back in the 50s in the mountains to the 70s at lower elevations by the weekend. Another burst of offshore winds will develop over much of the region tomorrow night through Sunday. This particular event looks to be at least as strong as the current offshore wind event and may be a bit more widespread as well. All winds should weaken Monday. Some clouds may reach the Sierras Saturday and again Tuesday, but no significant precipitation is expected through the 23rd.
